I am writing to say what a great experience I had with All Phase Building Concepts.

My project began as a "Do it yourself" project, but when I realized that my home had some damage to the stucco and framework that was causing water to seep inside the house, I knew I needed a pro. I needed new stucco, new interior and exterior paint, cracks sealed, new tile, and base moldings.

Being new to the area, I didn't have too many options for a referral, so I took my chances on Google and found Rick. Immediately, I knew I had a true professional. From start to finish, I was amazed at the craftsmanship, professionalism, and helpfulness of every member of the team. Everything was done as per the original quoted prices (no extra's tacked on) and well within the scheduled time frame for the project, and my wife and I could not be happier.

I was so impressed, that I already have Rick quoting me for future projects that I have on the horizon, and I know who I am calling to do the work when the time is right. I would highly recommend Rick and All Phase Building Concepts for any project.

Thanks!
